Pegu Projects & Engineering BV

Strong through combination

Collaboration with Pegu Projects & Engineering BV is a self-evident choice for many of our clients.

This is the dual result of experience gained over many years and our drive for continuing innovation.

Pegu Projects & Engineering BV is your partner par excellence, especially when it comes to IFDS concepts (Industrial, Flexible, Durable, Sectional).

We are the creative problem solvers for all temporary or semi permanent infrastructure and accommodation issues. As expert discussion partners and advisers, we assist you to lift your ideas to a higher dimension. New construction and renovation projects according to IFDS concepts are in trusted and capable hands from beginning to end.

Our specific expertise comes into its own in our integral approach, under which we deploy the most skilled and specialised firms to carry out the work on a discipline by discipline basis. That results in important efficiency benefits within a cost efficient working framework, all part of a transparent project organisation.

A cast-iron combination

Pegu Projects & Engineering BV

Always within reach

Whenever it comes to integral temporary accommodation issues, the “everything under one roof” concept offers a wide range of options. All with the decisiveness that characterises an orderly and compact organisation.

Orderly, compact, and permanently in touch with our partners on a discipline by discipline basis in your very own field of work.

Being close to hand also means that at Pegu Projects & Engineering BV we set great store by personal contact. Projects have a high probability of being successful if the lines of command are kept short and the number of contact persons is kept to a minimum. This is why your contact person within our organisations always functions as your permanent point of contact , whichever discipline you might ultimately decide to call in.

Pegu Projects & Engineering BV

Durable construction

Durable construction is more than just a modern slogan at Pegu Projects & Engineering BV.

We have been integrating as many durability features as possible into our techniques for years and we are highly creative in offering alternative solutions. We see it as a challenge to explore just that extra step further. Use of durable materials and self-contained water systems, innovative energy use and taking mother nature into account characterise the ways in which Pegu Projects & Engineering BV offers projects durable, and frequently even aesthetic, added value.

New business

In New Business areas, Pegu Projects & Engineering BV is engaged on developing new concepts in the integral accommodation field. We offer solutions to cell shortage problems and student accommodation needs for instance by building units in accordance with the IFDS concepts (Industrial, Flexible, Durable, Sectional).

Looking Ahead

As Pegu Projects & Engineering BV is a company that never promises more than we can keep and thus always fulfill our clients' expectations we are currently rapidly expanding our operations to other post-conflict areas around the world.

By never letting our customers down we have been requested to bid for contracts and are presently considered for a number of projects in Maroc and Sudan. Pegu Projects & Engineering BV is also setting up a permanent operation in Afghanistan.

Pegu Projects & Engineering BV

Giving back to the community

Pegu Projects & Engineering BV is a private organization; however, it also values the humanitarian cause. In all the countries we operate, we ensure a return to the communities in which we work.

Pegu Projects & Engineering BV has constructed schools and provided fresh water for communities and hospitals.

We believe that by giving back to the community Pegu Projects & Engineering BV provides sustainable long-term relationship with its inhabitants with the understanding that the more you give the more you will get back.

For this purpose, Pegu Projects & Engineering BV has created a development fund to support non-governmental organizations that add value to the communities

Pegu Projects & Engineering BV

Our Services

Most conflicts involve the destruction of basic infrastructure and the complete lack of a support structure allowing the international community to provide aid to people in need.

Pegu Projects & Engineering BV provides various packages that range across the board from turn key camps to security installations and many others.

We assess our client's needs and offer them options that suit the political and budgetary restraints that they are faced with.

No job is too small to be considered and all clients regardless of their Needs are afforded the same dedicated service we pride ourselves on.

Sectoral coverage

- Building
- Agriculture
- Industry
- Transport
- Forestry
- Power
- Water and sanitation
- Environmental
- Relief aid
- Engineering
- Training and education
- Health care
- Human resources
- Research and development
- Telecommunications

Pegu Projects & Engineering BV

The areas we cover:

Construction:

We have experience in Camp constructions utilizing standard materials for long term projects as well as expedited projects for fast and immediate programs.

Standard constructions sometimes are not feasible in the environments are clients work in and we try to ensure that our needs assessments of the conditions match our clients requirements.

To date we have provided

Prefabricated buildings
Temporary shelters
Tent cities
Concrete and brick buildings
Rehabilitation of existing structures

Infrastructure support

Post conflict countries share a common denominator with their lack of infrastructure and we emphasize this development through the following:

Access roads
Water wells
Drainage
Boundary walls
Irrigation channels
Septic systems
Water filtration systems
Electrical systems

Pegu Projects & Engineering BV

Procurement:

The lack of goods within the areas we work in severely hampers most projects and with that in mind we have developed strong links with manufactures of essential commodities such as:

Generators:

AKSA, Perkins, Cummins, Caterpillar, Honda and John Deer from 5 KVA upward.

Lighting:

Halogen, florescent, mercury and many others

Security:

Blast film, Sniper screen, Concertina Wire, Barbed wire, Heskos boxes, vehicle impalers, concrete barriers and bunkers.

Electrical:

Top quality cabling, panels, circuit breakers, changeover switches, and Automatic transfer switches. We work within US and European standards to ensure safety of all equipment and its installation.

Heating and cooling systems:

Hot/cold air conditioners of various sizes, Oil heaters, and ventilation systems.

Water systems:

Pumps, pipes, water tanks, pressure tanks, boilers and various others.

Furniture and fittings:

From office to home we provide all essentials such as carpeting, sofas, desks, student desks and chairs, kitchen equipment and many others.

Pegu Projects & Engineering BV

Logistics:

All the work that we do requires logistical support that we develop through local and international partners. We use the most cost effective air, sea and land transport (and sometimes donkeys and camels, if needed) for a practically seamless supply chain in rough environments. We provide:

Specifically tailored and adapted transport systems

Logistical solutions for mobile operations

Warehouse management

Warehouse security solutions

Pegu Projects & Engineering BV

Human Resource- and industrial

Pegu Projects & Engineering BV stands for development of vocational training, which clearly indicates our involvement in all aspects of Human Resource Development Projects and in particular Vocational Training Activities.

These areas are our major specialisation and we can cover all aspects of these projects. Throughout the years we have extended our activities to Industrial Development Projects, given that training/education projects are often closely related to the industrial or agricultural developments in a country. We can offer turn-key services which include Consultancy, Project Planning & Co-ordination, Supply of Equipment, Installation, Commissioning, Training and Aftersales Service.

Implementing Projects in Developing Countries often faces many problems and delays, due to the fact that Project Implementation Units (PIU) find it difficult to obtain objective and consistent information or reliable suppliers for their particular project. As such Supply of Equipment is becoming one of our major activities, we at Pegu Projects & Engineering BV have the experience to determine the specific needs of a project and to offer the right solution.

We consider problem solving as a challenge and are constantly improving our services in order to meet the demands of our customers.

Many organisations have benefited from our experience and we have proven to be a reliable company when it comes to successfully completing projects on time and meeting project specifications.

Pegu Projects & Engineering BV

Education training equipment

Pegu Projects & Engineering BV develops and produces an increasing range of educational training equipment suitable for different levels of education. Our training equipment is mostly developed and designed in close co-operation with experts in the field of education and industry. Furthermore we have facilities to develop & produce tailor made training equipment according to project requirements and purposes, including supporting materials like: teacher/student manuals, exercise books, overhead transparencies, video/audio tapes, slides, CD-Rom, etc. We are able to cover the following disciplines:
